

FIG. 1

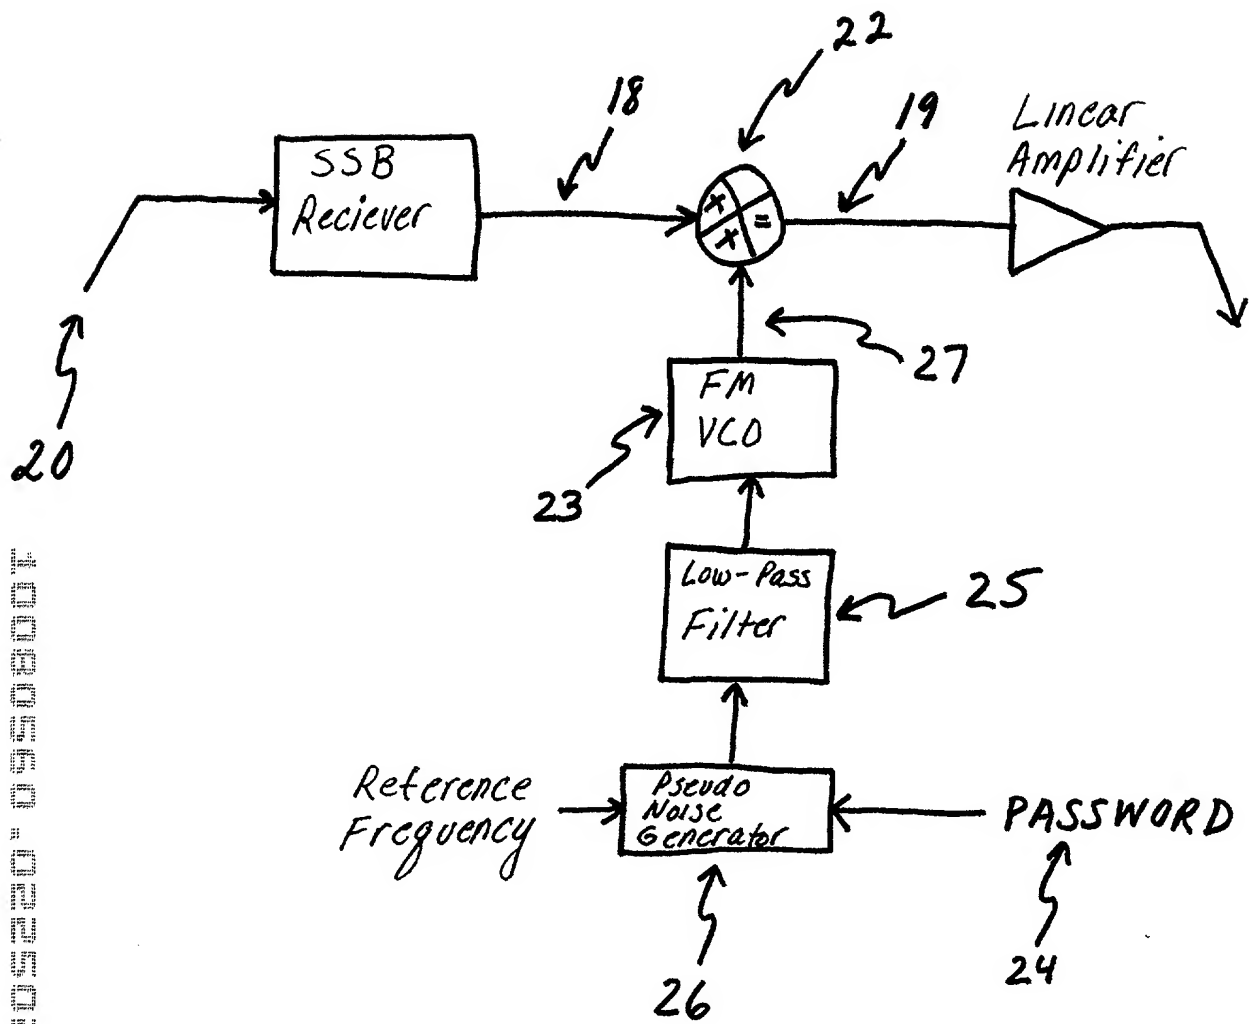

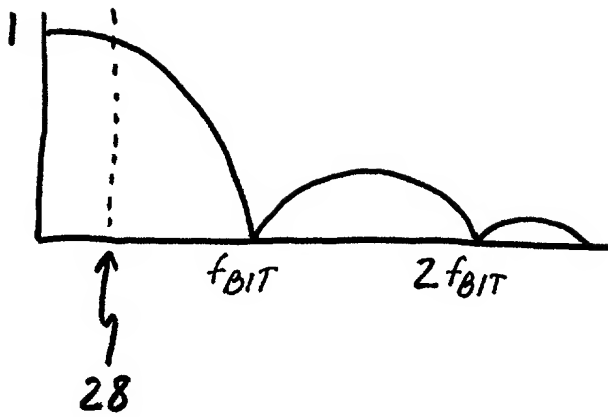

FIG. 2

The graph shows Power Density (dB) on the y-axis (ranging from -10 to 30) versus Frequency in Hz (dF = 15.26e-3 Hz) on the x-axis (ranging from 20.5 to 30.5). Five peaks are identified and labeled with handwritten numbers 35 through 39. Each peak is marked with a small arrow pointing to its maximum value.

Peak Label	Frequency (Hz)	Power Density (dB)
35	~22.5	~28
36	~24.5	~28
37	~25.5	~28
38	~28.5	~28
39	~30.5	~28
